Instructor	Text Responses
	Question: Use this space to comment on the instructor's use or non-use of technology.
	Dr. Kings use of technology went hand in hand with the class and always made learning the material easier.
	Kings use of technology was very important to the class because it is Writing In The Digital Environment. It is important to note that computers are needed for every class but all of the topics online were very interesting and went with the theme.
	The website system was good and helped.

	Being able to choose a technology to use and learn helped a lot. I feel like I've learned life long programs that will aid me in the future
	We used technology mainly in this class and for all our assignments we would post to a website or would read articles and write and share our work.
	I thoroughly enjoyed all of the different technologies we used for projects. I learned much more than I thought I would - from creating my own website to using video editing programs. These skills are all very applicable to me and my future career, so I felt like I got quite a bit out of this course from the technology we used.
	Question: Final Comments: use this space to provide any additional comments about the course, the instructor or both. Please feel free to comment on areas such as: the instructor's engagement of student interest, the instructor's responsiveness to students, the syllabus, the readings, the exams, the assignments, the instructor's evaluation of your work, the online learning technology.
	This class was challenging but always engaging and fun. I enjoyed pushing myself out of my comfort level and using different technologies Ive never even heard of before. I learned a lot this year while taking this class and would definitely recommend it to my friends.
	Very good.
	Amazing class and a great teacher , the readings were not great but the writing pieces and projects were extremely fun and I enjoyed doing them
	This was a great class and I really enjoy Dr King. I actually really liked his grading ideology (but it did take some getting used to). I would recommend this class and would like to take another one with him in the future.
	Really fun and interesting class, I learned a lot and it is technology based and you learn how to make a website create posts and make remixes of others work.
	I really disliked the grading policy. Having everyone start at a B and then having to do extra work outside of class (beyond the normal readings and projects) to increase your grade just seemed unnecessarily complicated to me. I think that the system is not entirely flawed, but I felt like it could be adjusted to be a bit less complicated. With that being said - overall, I really did enjoy the course and would strongly recommend it to others.
	Question: Use this space to comment on the instructor's teaching methods lecture notes, podcasts, discussion forums, group work, etc..
King	Dr. Kings teaching methods were always engaging and allowed us to see where our peers were at in the material during group work.
King	Showing off writing and projects in groups was fun but felt like people were too afraid to hurt others feelings. But it was fun to show off work that I put many hours into
King	Very good, was able to connect with the students for projects.
King	Dr King is super insightful and really helps us understand what he is doing and saying at all times. Hes great in and out of the classroom and is always willing to help through email or conference with whatever we need.
King	Shares his thoughts but leaves room for students to share their ideas and opinions.
